

106R Marble Polishing Fluid/MSDS

(Perform Granite Gloss)

Perform Granite Gloss is a gel that provides the final polish after restoration or shop honing to most granites. PGG also proves very effective as a maintenance product for repolishing slightly worn traffic areas in commercial buildings without honing. PGG works well with standard buffing machinery and can be colored black for dark granites. PGG is also effective to refreshen marble and as a great final step on green and black marble and terrazzo.

Directions for use:

Apply one heaped tablespoon of PGG to the granite and add ½ tablespoon of clean water. Use a standard floor machine (175-300 rpm) with a natural fiber pad. Buff this over an area of approximately 1-3m until dry and free streaks.

Note:

For Black or other dark granites it may be necessary to blacken the compound. To do this add ½ teaspoon of PGG black coloring to one tablespoon PGG and mix until compound is evenly blackened.

Coverage:

30-50m per kilogram

Packaging:

1-kilogram plastic container
1 kilogram black colorant
(special order)

First Aid:

Eyes: Flush eyes with plenty of water, occasionally lifting the lower and upper lids.
Skin: Wash with mild soap and water or waterless hand cleaner to remove carbon black dust.
Inhalation: For inhalation discomfort, remove to fresh air.
Ingestion: Entry by mouth is not likely to produce adverse effects.

Technical Data:

Part No:	BMP 310	Boiling Point:	N/A
Solubility in water:	N/A	Specific Gravity	N/A
Vapor Pressure	N/A	Odor	Odorless
Vapor Density	N/A	Freezing Point	N/A
Color:	Grey Paste pH: N/A	Flash Point	N/A
Viscosity:	N/A
